

# Gastroenterology

Cerner's gastroenterology EHR equips physicians with the latest in diagnostic technologies to successfully treat digestive disorders ranging from mild, such as Irritable Bowel Syndrome, to severe, such as Crohn's disease. More than 1,400 on-staff Cerner clinicians built the foundation of our EHR complete with GI-specific templates that automatically populate patient information, eliminating duplicate entry and providing pertinent patient history during the exam.

- Cerner's GI-specific templates make it easy for providers to document pre- and post-operative procedures, such as Endoscopies
- Detailed adam.com drawings of the esophagus, stomach, intestines, colon, liver and gallbladder are embedded into the note and can be easily be accessed and inserted into notes
- Identify, customize and provide Patient Education from GERD to Colonoscopies at the point of care

## Key Benefits

- Monitor and manage E/M coding
- Optimize workflow with easy and efficient documentation customizable per provider
- E-prescribe common prescriptions for no pharmacy wait time

"With Cerner's EHR, it is so much easier to find things. Labs are populated right to my inbox so all I have to do is sign."

Robert Hawkins, MD — Golden Isles Colon & Rectal Clinic, PC (Brunswick, GA)
