

# Urgent Care

Built specifically for the urgent care setting, Cerner Ambulatory Urgent Care is tightly integrated with your laboratory, radiology and pharmacy systems, creating an entire view of the patient encounter. Key features include:

- Workflow-driven patient tracking system for a holistic view of all patients in the clinic
- Streamlined ability to track, document, trend and checkout patients from a single screen
- Seamless lab, radiology and pharmacy integration creating a link to the entire patient encounter
- Event icons alert clinicians to tasks completed and still outstanding
- Quick, single-click access to medications, orders and charges, history and allergies, and more enables efficient provider documentation

## Key Benefits

- Patient tracking and rapid charting from a single screen
- Specific urgent care templates to increase efficiency
- More than 100 diagnoses unique to urgent care setting
- Collects and collates data for trending

“The other systems had a lot of click-click here and there, or do this and do that. It was just very complex. To me, other systems were very complicated compared to Cerner. Cerner tells you exactly what to do and where to press.”
